

# Maths challenge - Bird's Eggs

3 birds laid some eggs.

They lay an odd number each.

Odd numbers they could lay are 1,3,5,7,9

Altogether they lay 19 eggs!

Work it out

How many could each bird have laid to make a 19 total?

Find another answer

Find as many ways as you can to have 19 eggs

Prove it

How do you know you have found all of the possible ways?

Change the question

Think ..... What if the birds lay an even number of eggs?
