

Maths challenge -At the toyshop

The toy shop stocks tricycles and go-carts

The tricycle has 3 wheels and the go-carts have 5

Work it out

Suna counted the wheels.

There were 37 altogether

How many go-carts? How many tricycles?

Find another answer

Is there a different way to do it?

Prove it

How do you know you have found all of the answers?

What if the shop sold scooters?
